Regional Ramblings

REGIONAL RAMBLINGS

As many of you are aware, the Constitution of IPSC Canada prevents my running again for the position of Regional Director, and this will be the last issue of DILIGENTIA before I step down at the 1993 Annual General Meeting in Saskatoon.

In parting, I would like to thank you for the privilege of serving as your Regional Director for the last five years. The support of the National Executive Council and the members themselves has been tremendous, and our sport remains strong and healthy in spite of the efforts of lawmakers at all levels to restrict our ability to compete. We have just welcomed Newfoundland & Labrador as our newest Section, and we will be sending the largest Canadian contingent ever to the 1993 World Shoot in England. This vitality is a tribute to the enthusiasm of you, our members, and you are to be congratulated for it.

During the nomination period for candidates for the position of Regional Director, the only name put forth was that of Bryan Hodges, the immediately past Section Coordinator for Alberta. Bryan will assume the Regional Director's responsibilities at the close of the 1993 Annual General Meeting. He is a capable and dedicated individual, and I would ask that you give him your fullest support.

The failure of our Provincial and Territorial Attorneys General or Solicitors General to grant us the oft-promised exemptions from the new magazine capacity restrictions has been a great disappointment to us all. This topic is addressed elsewhere in this issue, and I encourage each and every one of you to fight these decisions with all possible force. Even if you have no intention of ever using a large-capacity magazine, please understand that only a concerted opposition at this point will prevent or delay the next restriction of the shooting privileges we now enjoy. If no serious resistance is mounted to this latest travesty, can any of us believe that the complete prohibition of handgun ownership in Canada will be far behind?

REGIONAL RAMBLINGS

Now that I will be free of the administrative responsibilities, I look forward to seeing many of you out on the range, where my old-style .38 Super will now be competitive again.

SHOOTING COMMUNITY BETRAYED!

The recent decisions by the governments of virtually every Province and Territory not to grant any magazine capacity exemptions to legitimate competitive shooters represent the latest steps in the betrayal of the recreational shooting community by all levels of Government. While decisions have not yet been announced by either Alberta or Quebec, it would be unrealistic to expect either of these Provinces to buck the prevailing trend.

We all know, and so do the policing agencies, that this is simply an attempt by them to look as if they are actually doing something about the perceived "gun problem", and that this elimination of our privilege to use large-capacity magazines in legitimate competition will have no effect whatsoever on the incidence of firearms violence in the streets of our cities and towns.

From the beginning of discussions on changes to Federal firearms control legislation in Canada, we have been assured by a succession of Federal Solicitors General, and their Provincial counterparts, that these new controls were not intended to affect us. It was acknowledged from the outset that we were not the problem, and that the necessary exemptions would be granted to allow us to participate in our legitimate sporting disciplines.

The first sure sign of big trouble came when the Federal authorities shirked their responsibility in this area and delegated the exemption question to the Provinces and Territories. This was clearly an attempt to duck the issue, and it missed a golden opportunity to tighten up and standardize the differing interpretations and inconsistent applications that have come to characterize firearms legislation in Canada.

Up until the last week of June, virtually every Province and Territory was expecting the magazine capacity limits to be delayed by at least 90 days, and probably 180 days, beyond the scheduled implementation date of July 1. It was only with the official Justice Department announcement on June 28 that the Provinces and Territories realized that the magazine capacity limitations were going to become law only three days hence.

As a result of this law, your National Executive Council has decreed that handgun magazines with a capacity of more than 10 rounds, or rifle or shotgun magazines accepting more than 5 rounds, will not be allowed in any competitions sanctioned by IPSC Canada or any of its Sections after July 1, 1993.

REGIONAL RAMBLINGS

So what do we do now?

At the **IPSC Canada level**, we have arranged for a couple of lawyers with significant experience in the firearms area to address the National Executive Council in Saskatoon, and offer their suggestions as to the best ways to proceed. Please be assured that IPSC Canada will not let the matter rest - we are committed to pursuing large-capacity magazine exemptions for our competitors through all possible avenues of appeal.

At the **Provincial level**, both Section Executives and individual members are encouraged to apply maximum pressure to those who denied us these exemptions. The most effective form of pressure may vary somewhat from province to province, and will likely include swamping firearms registrars with formal requests for exemptions, and the courts with judicial reviews of every such request that is refused. Please contact your Section Executive for information and guidance on how best to proceed in your jurisdiction.

On an **individual basis**, the full force of your fury should be directed at the Conservative candidate in your riding in the upcoming Federal election. Regardless of whether that candidate is the incumbent or not, he/she must be made to realize that the shooting community can no longer trust the Conservative government to keep its word, and that our votes will be cast for anyone but that party's candidates. Particularly with the Conservative Party now being led by someone who took a key role in this betrayal, this Fall will give us an immediate chance to express our disgust at the ballot box. Before deciding which non-Conservative candidate will get your support, make sure you have determined their position on the issue of large-capacity magazine exemptions for legitimate competitive shooters, and that they know that this particular issue is bringing them your vote.

The battle is a long way from over, and we'll keep you posted as things develop.

DVC,

F.W.Lorne Rowe
Regional Director

ALBERTA

ALBERTA SECTION REPORT

IPSC Alberta has again enjoyed a successful season, having just completed our 1993 Provincial Championship at the end of June.

The Top Ten in Alberta for 1993 are:

Ivan Runions	Provincial Champion
Darrell Wilks	Second Overall
Ken Kupsch	Third Overall
Bryan Hodges	Fourth Overall
Ted Pritchett	Fifth Overall
Mike Gryba	Sixth Overall
Rich Berndt	Seventh Overall
Ralph Turner	Eighth Overall
Jim Campbell	Ninth Overall
Scott Finnebraaten	Tenth Overall

The top six of these individuals will make up the 1993 Alberta Gold Team, and they have every intention of bringing the AFSS Cup back to Alberta where it belongs.

At our Annual General Meeting, held in conjunction with the Provincials, IPSC Alberta changed its structure to a "zone" system, and elected the following Directors for 1993-1994:

Section Coordinator	Rick Clements
North Director	Chris Ringstad
North Central Director	Ken Black
South Central Director	Mike Gryba
South Director	Rob Roerick

We hope that this new system will give each of our members greater access to the Board of IPSC Alberta, and will provide a solid base for the continued growth of IPSC in this Province.

Lorne Rowe informs me that no nominations other than mine were received for the position of Regional Director of IPSC Canada, and I look forward to taking on this responsibility after the 1993 Annual General Meeting in Saskatoon.

DVC

Rick Clements
Section Coordinator - IPSC Alberta

BRITISH COLUMBIA

BRITISH COLUMBIA SECTION REPORT

British Columbia is in the midst of our best year ever!

Our membership has already topped 500, and could break 600 by the end of 1993.

We have a full schedule of 14 sanctioned matches for the 1993 season, and all those held so far have been over-subscribed and have had to turn people away. We hope to ease this crowding problem by having each of our Zones hold more sanctioned matches beginning in 1994.

Our Provincial Championships are being held over the Labour Day weekend, and we expect a record number of entries.

Our first-ever Provincial 3-Gun Championship was held June 19 and 20.

BC has already registered 40 shooters for the 1993 Canadian Nationals in Saskatoon, and will have a very strong contingent ready to bring back THE CUP.

I believe the most immediate problem for IPSC in Canada is the recently-introduced legislation eliminating our right to own and use large-capacity magazines. This is only the first thrust of Federal firearms control legislation, and future changes will affect all of us to an even greater extent, regardless of the type of gun we use. To help combat this erosion of our privileges, British Columbia will be proposing a surcharge of \$5 on each membership and \$1 on each sanctioned match fee, with these funds to be specifically directed into a legal fund under the direction of the National Executive Council of IPSC Canada.

IPSC Canada will be sending its strongest Men's and Ladies Teams to Bisley for the World Shoot in September. I think both Teams have excellent chances of winning medals, and this is a great testimony to the strength of our sport in Canada. We send these Teams off with our very best wishes for a successful match.

I look forward to seeing many of you in Saskatoon.

DVC
Randy Fisher
Section Coordinator - IPSC British Columbia

ONTARIO

ONTARIO SECTION REPORT

Allow me to introduce myself. My name is Dino Evangelinos and I am the new Section Coordinator for IPSC Ontario. As most of you know, IPSC Ontario operates with a board of five directors and I would like to take this opportunity to present the other "new faces" of the 1993-1994 IPSC Ontario Board.

First there is Brian McGee, who is not a newcomer to the Board. Brian is the IPSC Ontario Vice-President and is charged with the responsibility of the Provincial Black Badge training program. He took on this assignment of coordinating the Black Badge program enthusiastically last year and has done an outstanding job.

Bud Melless and Peter Beckett are new to the Board this year and come with extensive administrative experience and computer skills (this should be exciting). Last, but certainly not least, well-known Ian McCulloch. Ian has served on the Board in the past, as well as several other shooting associations and clubs.

All in all, as you can see, this is quite a group of dedicated and enthusiastic people and it will be quite a privilege to be working with them. I hope everyone joins me in extending our congratulations to each of these gentlemen.

1993 Ontario Provincial Championships

The 1993 Ontario Provincial Championships were held at Trenton the weekend of June 26th where the perfect weather was matched by a perfect weekend of shooting. Two hundred and twenty-five competitors raced through the twelve stages to see who would be crowned the 1993 Provincial Champion. Our thanks to Jack Payne and the dedicated members of the Lower Trenton Club who made the Provincials of 1993 such a huge success.

Jamie Armour would not be denied.....and was crowned Ontario Provincial Champion.

Overall Match Winner

Milford Lovett (USA)

Overall Ladies Winner

Sheila Brey (USA)

The Northern League has been very busy during the last season. We had the opportunity to meet and talk with the Club Reps during the Northern Open in Sault Ste. Marie this July. It was firmly believed by all concerned that geographical distance should not be a deterrent to good communications, cooperation, and dialogue.

Our membership has steadily increased in 1993 to a total of 1200 paid members.

Sincere appreciation and many thanks go out to all the Black Badge instructors who taught 537 novice shooters. 400 of those have had their qualifying match as of the Annual General Meeting in June.

Our objective for 1993 and 1994 is to qualify more Black Badge and Range Officer instructors to accommodate the need for our present members as well as potential new ones.

DVC,

Dino Evangelinos
Section Coordinator - IPSC Ontario

NEWFOUNDLAND

NEWFOUNDLAND & LABRADOR SECTION REPORT

IPSC Canada is now represented in Canada's easternmost Province!

After much preliminary discussion, a group of serious shooters in Clarenville applied to form the Newfoundland & Labrador Section of IPSC Canada. When our efforts to get to Nova Scotia for a Black Badge course were frustrated by the failure of Triton Airlines to get off the ground, we decided to bring IPSC to us.

From June 11-13, Lorne Rowe and Don Broomfield came down from Toronto to put on a Black Badge course, deliver a draft Constitution, and discuss everything else that is necessary for the establishing of a new Section. The course was held outdoors, in the wind, rain and low temperatures that constitute summer on "the Rock", but everybody persevered and all nine students graduated to form the nucleus of IPSC Canada's newest Section.

The charter members of IPSC Newfoundland & Labrador are:

Greg Adams	Glen Balsom
Don Blackmore	Ralph Duffitt
Rod Long	Albert O'Mahoney
Bob Parsons	Jerry Stacey
Kent Vey	

We are now in the process of incorporating our Section and electing the necessary Directors and Officers. We have established contacts with most of the shooting organizations in the Province, and will be spreading the IPSC "gospel" throughout the Island. We expect a high degree of interest once shooters in the outlying areas get to see exactly what this sport is about.

We are extremely pleased to be associated with IPSC Canada, and we welcome any IPSC Canada member to shoot with us whenever they are in Newfoundland.

We're small now, but just watch us grow!

DVC,

Jerry Stacey
Section Coordinator - IPSC Newfoundland & Labrador

SASKATOON WILDLIFE FEDERATION RANGE, SASKATOON, SK.

ATTENTION: Non - Canadian Competitors: To facilitate the acquisition of the necessary conveyance permits for you while in Canada, please notify the Match Director of your intention to compete in the 1993 Canadian Nationals at the earliest opportunity by letter or phone in order that the necessary forms can be sent to you.

RANGE RULES

This competition is governed by the 11th edition rules of I.P.S.C. and the following range rules

- All pepper poppers must fall to score and are scored as 10 pts. each.
- Ear and eye protection is mandatory for both shooters and spectators. If they are lost by a competitor during a course of fire they must be replaced before continuing. Failure to do so will constitute a procedural error for each shot fired while the equipment is not in place.
- The Saskatoon Wildlife Federation ranges are closed to the general public and are open only to competitors of the 1993 IPSC Canadian Nationals and invited guests only
- No alcoholic beverages are to be consumed on range property except at the clubhouse and only after all shooting is completed for the day.
- We emphasize a conduct appropriate to our sport. Foul and/or abusive language will not be tolerated. Repeated incidents on or off the range may result in the competitor or spectator being asked to leave the range.
- Please refrain from camo or image-tarnishing clothing.
- Safety areas will be clearly marked and are the only areas where firearms may be handled (other than while on an active range and under the direct supervision of a range officer) including bagging / unbagging, holstering / unholstering, practice draws, dry firing, gun repair and sight blacking. NO handling of any ammunition.
- Bagging / unbagging of firearms may also be accommodated if requested on each stage under the direct supervision of the range officer on that stage.
- No handling of firearms is permitted in any area on the ranges other than the designated safety areas, unless under the direct supervision of a Range Officer. In the display area, guns may be handled off the tables only under the express permission of the display personnel. Guns brought to gunsmiths in the display area for repair or inspection must be bagged.
- Taking a sight picture on the range is permitted only with an empty gun and only after the command to "load and make ready" is given by the Range Officer.
- Should any firearm inadvertently fall from a holster or be dropped at any time or place other than during a course of fire, the competitor must not attempt to re holster the firearm themselves, but shall do so only under the direct supervision of a Range Officer after showing that the gun is unloaded and clear in a safe manner / direction. No penalties shall be incurred.
- Rules governing a dropped or fallen firearm during a course of fire shall be applied according to the 11th edition of Rules of the International Practical Shooting Confederation.
- The course of fire shall be defined as beginning at the command "load and make ready" and at the end with the command "range is clear".
- Chronograph - eight rounds will be collected at random from each competitor. One bullet will be weighed, then three fired from the competitor's gun over the chronograph. The average of the three velocities and the actual bullet weight will be used to compute the power factor. If the first test is a failure, three more rounds will be fired and the power factor re-computed. If this second test is a failure, the highest three velocities of the six rounds will be used to re-compute the power factor. If this also fails the competitor is given the choice of weighing or shooting the eighth round. If the results are an improvement, they will be used to compute the power factor. However if the competitor fails to achieve the stated power factor, all the stages will be recorded at the lower power factor. A shooter who fails the minor power factor is shooting for pleasure only and his / her scores are recorded as zero.
- Tables for retail sales will be available and competitors or guests are asked to refrain from commercial sales in areas other than the designated sales areas. Disregard of this request may result in the competitor or guest being asked to leave the range.

TRAIN WITH A WINNER

"My PACT MK4 Championship Timer is an integral part of my practice sessions. I only train with the best."

Doug Koenig

"I've been training with PACT timers for seven years. The new MK4 is an outstanding advancement. Robby and I played with it on the drive to the Masters, playing "what if" for hours. Well done PACT."

Frank Glen

"PACT did a great job of implementing my suggestion for a 'first shot' display on the new MK4. This feature is a real help with Steel Challenge practice. PACT has always been responsive to the training needs of the modern competitor."

Mike Plaxco

"I can't always get to the range to practice. The PACT MK4 lets me set up just about any course of fire at home, allowing me to get the most from my dry firing sessions. It's an essential part of my training gear."

John Pride

"I've trained exclusively with PACT timers for the last ten years. When I retired from shooting this summer I sold just about all of my equipment. One thing I just couldn't part with was my new PACT MK4 Championship Timer. It's just that good."

Brian Enos

"When I train I like to keep a detailed record of my performance. This allows me to make objective assessments of different techniques and equipment. My PACT Timers have been an absolutely critical part of my training regime for my entire shooting career and have been an important key to my success. The new PACT MK4 and printer allow me to break my shooting down into bite size pieces. I wouldn't be without them."

Jerry Barnhart

"I've been training with PACT Timers for years so I'm used to the best, but I must say that the new MK4 surpassed me. It's really incredible that so many new useful features can be packed into such a small package. I've also been impressed with PACT's willingness to incorporate our suggestions into their timer. It's a truly outstanding product."

Alan Fullford

"Ten years ago, when PACT introduced their first timer I said 'The PACT Championship Timer is the only timer you will ever need.' Over the years PACT's timers helped teach us what works (and what doesn't) as well as keeping things honest at matches. Not only is the new MK4 unquestionably the finest shooting timer ever made its chronograph and trajectory functions are second to none. I never go to the range without my PACT MK4 and neither should you."

Robby Leatham

30 Day Money Back Guarantee & Limited Lifetime Warranty

Training with the MK4 is guaranteed to improve your shooting. Try it for 30 days, if you're not completely satisfied simply return it to us for a full refund. If your PACT timer breaks we'll fix it free, if you manage to smash it we'll fix it for cost. If it says PACT on it we stand behind it.

A Timer for Matches

The PACT Championship Timer is the best training timer in the world. That's why the world's top professional shooters choose it for their vital practice sessions. However, it is something of an "over kill" for timing a match.

You Talk We Listen

As a club grows it's faced with the problem of needing several timers going at once to move shooters through the match at a reasonable pace. Many of our customers have asked us to provide a "minimum configuration" timer that could accurately time shooters but was inexpensive enough to allow a club to purchase several of them.

What's it do?

In order to accurately record a shooter's time the RO must be sure that the timer heard the correct number of shots, otherwise he doesn't know what he's writing down. The PACT Club Timer™ uses our copyrighted user interface to automatically display both the shot number and time. This allows the RO to confirm, at a glance, that the time recorded is correct.

The Club Timer contains the usual trick software that you've come to expect from PACT: No limit to the number of shots recorded. Unlike other timers that "lock" when the memory fills, the Club Timer will automatically replace the last shot in memory with the last shot fired. 999.99 second time limit. Instant or delayed go, status line tells you what mode it's in. Auto Sense stop plate jack allows you to use normally open, closed or momentary switches. The Club Timer won't let you start a run unless the plate is set back up. Optional print driver lets you make a hard copy of the shooter's time eliminating recording errors.

Software Up-grades

Like all PACT products the software in the CLUB Timer can be up-graded. For example, we had several NRA Action Shooting Clubs ask for a PAR time mode. You're the boss. Not only were we able to add this as a low cost option, we can go back to the first Club Timer produced and add it in. What form will future upgrades take? You tell us!

Trade up to a Championship Timer

The Club Timer is designed for running matches, and lacks the advanced training features of the Championship Timer. Nevertheless, for the individual who is just getting his feet wet in competitive shooting and finds himself attracted to the Club Timer we'll make you a deal. We'll give you a 100% trade in allowance on your Club Timer if you trade up to a Championship Timer within 30 days from the date of purchase. 75% credit if you trade up in the first three months and 50% any time within a year.

Made in America

We invented the modern shooting timer. We have been steadily refining and improving our products for going on ten years. PACT is American owned and operated. All of our Timers and Chronographs are built at our factory in Texas. This allows us to maintain a level of innovative engineering and responsive customer service that the foreign knock off's can't touch. If you have a question or a problem with a PACT Product you call us on our toll free customer support line. We'll take care of you.

30 Day Money Back Guarantee & Lifetime Warranty

As with all our products, we designed the Club Timer, we build it, and we sell it factory direct to you. We take full responsibility for your satisfaction.

If you are not 100% satisfied with any PACT product, return it to us undamaged within 30 days, and we will refund your money.

The Club Timer also features a real simple repair policy. If it breaks due to a defective part or faulty workmanship we'll fix it free. If you break it we will fix it for cost. No hassles and no questions asked.

Quantity discount package available for USPSA affiliated clubs.

LEATHAM HEADS SPRINGFIELD CUSTOM SHOP

Rob Leatham has been named director of the Springfield Custom Shop.

"We now have the tremendous experience and knowledge of the winningest professional pistol shooter in history to guide and direct the Custom Shop," said Tom Reese, Springfield co-chairman.

Leatham's duties will include product design and development for new custom pistols, marketing and promotion of the Custom Shop's products, and strategic planning and goal setting for the veteran team of gunsmiths.

"Rob knows guns," Reese said, "Not many people realize how technically knowledgeable Rob is. They think he just pulls the trigger, but he has a profound understanding of the 1911 pistol and its mechanical function. He also knows what competitors need in a custom pistol like no one else!"

Prior to the reorganization of the Custom Shop, Leatham had served as a consultant in new product design and development. "His role as director of the Custom Shop is re-

ally just a logical outgrowth and extension of Rob's previous association with the shop," Reese said.

Shooters interested in commissioning a Custom Shop pistol built to Rob Leatham's exacting standards should request a catalog from the Springfield Custom Shop, 25144 Ridge Road, Colona IL 61241, or call (309) 441-5549.

NOVA SCOTIA

NOVA SCOTIA SECTION REPORT

On June 29, I met with the Minister of Justice for the Province of Nova Scotia on the matter of large-capacity magazine exemptions for our members here.

The tone of the meeting was positive indeed, with Mr. Gillis acknowledging that we were legitimate competitors and not responsible for the irresponsible or criminal use of firearms. He further agreed that the chance of one of our large-capacity magazines being stolen and used in criminal activity was extremely remote.

So why did the very next day bring the announcement that Nova Scotia would grant no exemptions to Federal magazine capacity limitations?

We did nothing wrong, but our legislators, who are not at all knowledgeable about firearms or the actual extent of their use in criminal activity, were swayed by the combined rhetoric of the Coalition for Gun Control, the Canadian Association of Chiefs of Police, and the Nova Scotia Home and School Association, and took the "safe" way out.

In spite of the legislative setbacks, IPSC Nova Scotia is having a very good year from a shooting perspective. Our Provincials were held June 19 and 20, with Jon Gould from New Brunswick emerging as the Match Winner. Sean Hansen was second overall, and 1993 Nova Scotia Champion, with Richard Turner finishing third.

On behalf of all the members, I would like to extend a special thanks to Cliff Meek for his tremendous efforts on the Provincials, and for his never-ending support of our sport in Nova Scotia. We all owe him a lot, and we never seem to let him know how much we depend on him. Thanks again, Cliff!

DVC,

Richard Turner
Section Coordinator - IPSC Nova Scotia

QUEBEC

QUEBEC SECTION REPORT

Our future hangs in the balance as this is being written. It is June 30, 1993. We are expecting that our first outdoor range will be closed within the next few weeks for failure to comply with the new range norms which only come into effect officially in January of next year. The feeling of the SQ is that if the necessary architectural and drafting work for the installation of sky baffles etc. has not yet begun the range will not be ready in time. As this reflects an attitude of noncompliance on the part of the club the SQ will request that the Minister of Public Security revoke their permit NOW. All other clubs will be visited or have been visited and asked for the same thing.

Our long awaited meeting with the Minister of Public Security concerning our possession of Hi-Caps for competition was finally arranged for June 29, just before the July 1 implementation date for the new federal magazine restrictions. However the Minister, Mr. Ryan became ill and is still in hospital. The meeting is now going to occur after the implementation date...

Though things now look bad in most of the other provinces in regards magazines, we feel that there may still be a ray of hope here in Québec due to the fact that the Minister wrote me personally stating that he would take our case into consideration and that he then called us for this meeting. There is also the fact that the SQ has produced the necessary forms for requesting permission to possess the mags for specific competitions.

We may end up a distinct society after all. The only place in Canada where high capacity magazines can be used in IPSC competition but with no outdoor clubs available where we can hold matches to use them.

DVC,

Dave Young
Section Coordinator - IPSC Quebec

SASKATCHEWAN

SASKATCHEWAN SECTION REPORT

The biggest challenge for us here in Saskatchewan has been preparing to host the 1993 Canadian Nationals. Things are progressing well, with the course of fire finalized as 14 stages of pure shooting fun.

I would like to thank Bryan Hodges for his tremendous support in organizing the 1993 Nationals. When it's your first undertaking of a match of this size, its great to know that someone who has done it before is only a phone call away and always ready to help.

We are looking forward to welcoming many of you to Saskatoon for this match. We will have a great prize table as a result of tremendous support from many firms in the shooting industry, and we extend our appreciation to each and every one of them.

There are still a few slots left, so use the entry form elsewhere in this issue if you want to be part of the biggest IPSC match in Canada in 1993.

In addition to preparing for the Nationals, all the other aspects of practical shooting in Saskatchewan have also been going full steam. 12 new Range Officers were recently certified, and we are planning a CRO course for sometime in the not too distant future. We have qualified 32 new Black Badge shooters so far in 1993 and we extend a hearty welcome to these our newest members. Included in our new Black Badge graduates are 8 members of the Saskatoon City Police Emergency Response Team. These guys are terrific shooters, and every one of them comfortably met the course time constraints with duty guns and gear.

There is a rumour going around that the Saskatoon City Police and the Penitentiary Service from Prince Albert will have some Team rivalry going on at the 1993 Nationals.

I look forward to seeing many of you at this year's Nationals in Saskatoon. Bring lots of extra ammo for the plate warm-ups and for the stake shoot on Monday, August 2.

DVC,

Jim Schille
Section Coordinator - IPSC Saskatchewan

N.R.O.I.

NROI ASKS YOU

Today we are going to look at certain changes to the 11th edition IPSC rule book.

Our first occurs at a level I club match, where you are working for as an R.O. for your first time.

Vincent is an "A" class shooter with more experience than you could ever dream of. Today Vincent wants to compete in Standard Division. After you have given the command to LOAD AND MAKE READY, you notice that he is about to use a magazine which you believe to be extended.

As RO you explain to him that he cannot use this type of magazine under rule 7.05 which states that extension magazines are not permitted. Vincent pulls his rule book out and shows you that you are wrong as rule 7.05 stipulates that only magazines which at the longest vertical dimension inclusive of any substance affixed to the base plate exceeds 170 mm, shall not be permitted. He goes on to say that the mags he is using are the mags he has always used. What do you do?

Our second situation occurs during a provincial championship.

A competitor comes to the line with his holster behind his hip with some of his magazine pouches forward of his hip and some behind. This competitor is competing in the Modified division. As RO you notice the positioning of his equipment. Is there something wrong?

Our third and last situation occurs during a practise between friends.

You are practising when you hear other shooters talking about the new divisions. One of them mentions to his friend that he will no longer be able to compete in Major class with his .38 Super due to the new rule which states that only bullet diameters of 40 calibre and greater can now make major with the exception of the .357 Magnum. Other questions come up during this discussion. Can I use a compensator, optical sights or extended magazines? How will the results be tabulated? As RO what clarifications can you give them concerning these rules?

Answers

Situation number one:

If we base ourselves solely on rule 7.05 SHOULDER STOCKS, EXTENSION MAGAZINES your competitor is correct. However, if you look a little deeper rule 2.12 CONTEST DIVISIONS under part (iii) Standard clearly states that extended magazines are not permitted and defines an extension magazine as:

(a) One that clearly extends beyond the butt of the pistol, and can carry more rounds than the accepted factory standard for that pistol.

(b) Any substance affixed to the base plate of the magazine, for ease of reload, etc., is not considered as an extension but will not be utilized to increase the volume and/or carrying capacity of the magazine.

In conclusion, the competitor did not take into consideration all facets of the question before deciding that he was correct. Is a typical example of a rule which must be looked at in its entirety to be properly understood and applied. As RO it is also essential that you remain in control of the situation, regardless of the experience of the shooter in question. If you are unsure of a ruling refer to your rule book or your CRO.

Situation number two:

Again rule 2.12 CONTEST DIVISIONS this time under section (iv) Modified and Standard in paragraph (a) we find that for both these divisions all magazine pouches must be worn behind the hip as the holster must (you can use as a reference point the centre-line of the pants). There are no restrictions as to the type of holster or magazine pouches. However, it must not be forgotten that the inner surface of the equipment must not be more than 25 mm from the body when in the relaxed position.

Situation number three:

First of all rule 2.12 CONTEST DIVISIONS section (iv) Modified and Standard part (b) confirms what your shooter said in regards Major class, regrettably however this only applies to the Modified and Standard classes. If the shooter with the .38 Super competes in the Open division he can still compete in MAJOR.

Looking at part (c) of the same rule we find the answer to your friend's question regarding results. Overall match results will recognize a match winner in each of the other two divisions. Modified only and Standard only, match results are permissible in addition to overall match results.

In regards the question concerning the use of a compensator, optical sights, and extended magazines the answer is found in section (ii) Modified. This section clearly explains that limitations on the firearm are related to its size. This size is established by placing the firearm in box with the following dimensions 225mm x 150mm x 45mm (with a tolerance of +1mm, -0mm). Your firearm in its ready condition as per rule 8.01 READY CONDITIONS (see description below) must fit inside the box with an empty magazine inserted in the case of a semi-automatic pistol. All other magazines used must be identical to the one used in the box test.

8.01 READY CONDITIONS

N.R.O.I.

(i) Single Action Revolvers - hammer fully down on an empty chamber or in the safety notch (if fitted) over a loaded chamber, transfer bar designs excepted.

(ii) Double Action Revolvers - hammer fully down, (all chambers may be loaded).

(iii) Self-Loaders - Single action, hammer cocked with the safety catch on SAFE. Double action, hammer fully down. Selective action, hammer fully down or hammer fully cocked with the safety on SAFE.

I hope that these few lines will enable you to better understand the changes brought about by the arrival of these new divisions.

NROI VOUS DEMANDE ?

Aujourd'hui nous allons parler de certains changements de la 11 ièm édition du livre des règlements d'IPSC.

Notre première situation se passe dans le cadre d'une compétition de club de niveau I, en tant que Range Officer vous en êtes à votre première expérience.

Vincent est un tireur de classe A avec plus d'expérience que vous ne pourriez en rêver. Aujourd'hui il désire participer dans la division Standard. Après que vous lui avez donné le commandement LOAD AND MAKE READY, vous l'apercevez utilisé un chargeur que vous considérez comme une extension de chargeur.

Vous lui dites en tant que RO qu'il ne peut pas utiliser ce type de chargeur en vertu du règlement 7.05 qui stipule que les extensions de chargeurs ne peuvent être utilisées. Celui-ci sort son livre de règlement et vous montre que vous êtes dans l'erreur car le règlement 7.05 stipule que les chargeurs dont la longueur verticale maximum incluant toutes les substances fixées à la base du chargeur excédant 170mm ne sont pas permis. Il ajoute que ces chargeurs qu'il veut utiliser sont les mêmes qu'il utilise toujours. Que faites-vous?

Notre deuxième situation se passe lors d'un championnat provincial.

Un compétiteur se présente sur la ligne de tir avec son étui en arrière de la hanche, ses portes chargeurs sont disposés en partant du côté faible jusque vers l'arrière. Ce compétiteur participe dans la division Modified. Vous, en tant que RO/CRO avez remarqué la disposition de son équipement. Est-ce que quelque chose ne va pas?

Notre troisième et dernière situation se déroule lors d'une pratique entre amis.

Vous êtes entrain de pratiquer lorsque vous entendez d'autre tireur discuter des nouvelles divisions. Un d'entre eux fait remarqué à son ami qui tir un 38 super, qu'il ne pourra plus tirer majeur à l'avenir dut au nouveau règlement qui stipule que pour être majeur ont doit utilisé un boulet de calibre 40 minimum exemption faite du 357 Mag. De plus d'autres interrogations semblent sortir de cette discussion. Par exemple, puis-je utiliser un compensateur, une mire optique ou des chargeurs qui dépasse le bas de l'arme. De quelle façon les résultats vont fonctionné. Vous, en tant que RO /CRO, quelles explications pouvez vous leur donner concernant ce règlement?

Réponses

Situation numéros un.

En se basent seulement sur l'article 7.05 SHOULDER STOCKS, EXTENTION MAGAZINES votre compétiteur aurait raison. Cependant en regardant plus loin l'article 2.12 CONTEST DIVISIONS sous la rubrique (iii) Standard nous mentionne clairement que pour cette division une extension de chargeur est définie comme suit;

(a) Une qui s'étant au-delà de la base de l'arme, et peut contenir plus de munitions que le standard du manufacturier pour cette arme.

(b) Toutes substances fixer à la base du chargeur, pour faciliter le rechargement, etc., n'est pas considérées comme une extension de chargeur mais ne seraient pas utilisées pour augmenter le volume et/ou la capacité du chargeur.

En conclusion, le compétiteur n'avait pas considéré l'ensemble de la situation pour baser son affirmation. Ici vous avez un exemple typique d'un règlement qui doit être regardé dans son ensemble et approfondi pour en comprendre toute les facettes. De plus il est très important que peu importe le tireur et son expérience vous devez rester en contrôle de la situation, vous êtes le RO et en cas de doute référez-vous à votre livre de règlements et/ou votre CRO.

Situation numéros deux.

En effet en se rapportant encore une fois à l'article 2.12 CONTEST DIVISIONS cette fois sous la rubrique (iv) Modified and Standard dans le paragraphe (a) nous constatons que, pour les divisions Modified et Standard non seulement l'étui, mais aussi les portes chargeurs doivent être portés en arrière de la hanche. Comme guide vous pouvez utiliser la ligne centrale du pantalon. Aucune restriction ne s'applique au type d'étui ou de portes chargeurs. Cependant il ne faut pas oublier que la distance intérieure maximum de l'arme et de l'équipement ne peut être à plus de 25mm du corps en position relaxe.

Situation numéros trois.

Premièrement, toujours à l'article 2.12 CONTEST DIVISIONS nous nous référerons

au paragraphe (b) qui confirme les dires de notre ami tireur, malheureusement celui-ci, n'avait pas compris que cette disposition ne s'applique qu'aux divisions Modified et Standard par conséquent si le tireur qui utilise un 38 super tire dans la division Open il peut comme au paravent tirer MAJEUR.

Maintenant en allant voir plus bas au paragraphe (c) nous pourrons répondre à une des interrogations que nos amis avaient. En effet ce paragraphe nous explique que l'ensemble des résultats d'une compétition reconnaîtra un grand gagnant et un gagnant pour chacune des deux autres divisions. De plus nous voyons que des résultats séparés pour ces deux divisions en plus de l'ensemble des résultats.

Quant aux questions relatives à l'utilisation de compensateur, mire optique et/ou chargeurs dont la longueur excède le bas de l'arme, la réponse se trouve cette fois sous la rubrique (ii) Modified. Sous cette rubrique il est expliqué clairement que la limitation de l'arme provient de sa grosseur. Puisque pour cette division une boîte aux dimensions de 225mm x 150mm x 45mm (avec une tolérance de +1mm et de -0mm est utilisée).

Votre arme dans la condition prête selon l'article 8.01 READY CONDITIONS (voir description plus loin) doit pouvoir être insérée dans la boîte dans le cas d'un semi-automatique, un chargeur vide doit aussi être inséré dans l'arme et tous les autres chargeurs doivent être conformes à celui utilisé.

8.01 READY CONDITIONS

(i) Revolvers à action simple - Le marteau abaisser sur une chambre vide ou sur la coche de sécurité (si celle-ci est installée) sur une chambre charger, le design de bar de transfert est accepté.

(ii) Revolvers à action double - Le marteau abaisser, (toutes les chambres peuvent être chargées).

(iii) Semi-automatique- Simple action, le marteau en position armer avec le cran de sécurité à sa place, double action, le marteau complètement abaisser. Action sélective, le marteau est complètement abaissé ou le marteau en position armer avec le cran de sécurité à sa place.

J'espère que ces quelques lignes vous ont aidé à mieux comprendre les changements apporter par la venue de ces nouvelles divisions.

-Each Squad is expected to assist in the taping and setting of targets. Due to time constraints BRASS PICKING WILL ONLY BE ALLOWED WHEN THE INDIVIDUAL SQUAD HAS COMPLETED THE STAGE AND ONLY IF THERE IS TIME REMAINING IN THAT SQUAD'S ALLOTTED TIME FRAME (AT THE DISCRETION OF THE RO AND CRO OF THAT STAGE.

-ONLY MEMBERS OF THE ACTIVE SQUAD WILL BE ALLOWED TO PARTICIPATE IN THE WALK THROUGH AT EACH STAGE.

-Shooting boxes (if used) will be constructed of approximately 4 x4 cm. material. While shooting, at least one foot must be within the confines of the box and the other foot must be clear of the ground outside of the box. Feet may be on the fault line but must not touch the ground outside of the fault line.

-For the purpose of defining the Canadian Champion, residency will be determined according to the policy adopted by the World Assembly Adelaide, Australia: residency will be defined as the region where an individual is ordinarily domiciled for a minimum of 183 days of the twelve months immediately preceding the month in which the competition begins. The ordinarily domiciled condition is a physical presence test and bears no relationship to citizenship nor to any address of convenience that might be maintained. The 183 days need not necessarily be consecutive nor the most recent 183 days of the twelve month period. A resident of a Region shall not necessarily forfeit that status of being domiciled outside that Region while in the services of the armed forces or the government.

-If a competitor feels his / her status may be questioned or protested, they are advised to bring with them documenting proof of their residency.
